

# AWS™ Pedestal System

introduces

## Diamond Head™ Series

### ALWAYS INNOVATING

AWS™ Pedestal System just got better with the Diamond Head™ Series, the two-piece top cap twists from 1/8" to 1-1/4" inch, to virtually eliminate PVC cutting in the field. It is supported by a 6.5" new base cap for balance, and on most membranes this pedestal virtually eliminates the need for a "barrier piece" against the membrane. All shims lock with the new Diamond Head™ Series pieces to fine tune support and eliminate "rockers".

**AWS™** was developed by installers for installers. Its new twist-adjust and snap-together shims are efficient, economical, strong, and proven. **AWS™** is being widely used throughout the US and Canada by architects, builders, and homeowners. More affordable than other pedestals of its size, AWS takes its proven pedestal system to the next level. Contact your distributor for prices.
