

Developer: Mike Duncan - Allenbach Acres - Portland, Oregon

Preservation of lot values

Sound-abatement solutions

"The masonry structure definitely has esthetically enhanced our project. It also has the benefits of being low maintenance and an effective barrier against sound transmission."

— James Dobrick, Vice President, Mercer Construction Services, Inc.

A sense of 'place' and community identity

Developer: Centex - Bethany Crest - Portland, Oregon

Brick Fences & Entries

"When potential customers see our brick fence, they know this is a quality project."

— Roger Shubert, President, Mercer Construction Services, Inc.

Potential for greater density

A feeling of security for your customer

Developer: Mercer Construction Services - Chelsea Place - Redmond, Washington

Home buyers of the nineties demand quality, security and value in their homes and neighborhoods. Masonry offers all this and more.

Marylhurst - Lake Oswego, Oregon

Excellent marketing opportunities

Higher project visibility

Improved lot value

Above and Cover Photo: The Highlands - Tigard, Oregon

Developers who routinely use masonry fences and entries enjoy the benefits of shorter market time, higher margins, and that image of quality.

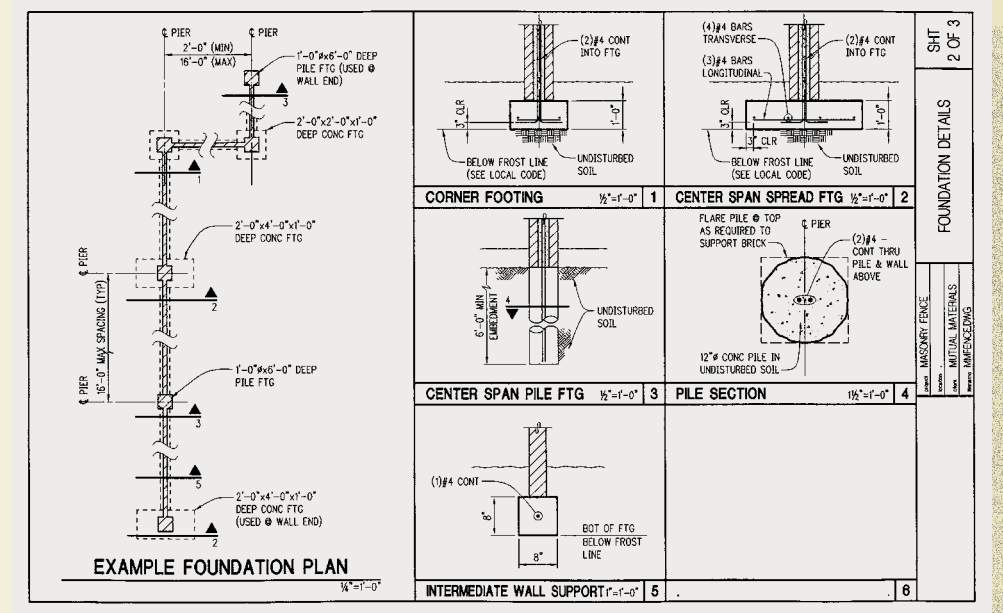

An identity and 'signature' for the development

Developer: Carl Coffman - Orchard Lake - Clackamas, Oregon

Mutual Materials has developed a system which is the most cost-effective method for building masonry fences.

These fences can be designed as 4-inch, single-wythe (single brick or block) walls which span between columns, eliminating the need for expensive concrete footings and reinforcing. These designs also reduce excavation costs.

The flexibility of this design allows the developer to tailor a masonry fence which best suits the project site.

Many design options are available.

For more information regarding masonry fences and entries consult your Mutual Materials Representative.
