

RomanStack®

Large Square Fire Pit

Size: Outside Diameter: 53" x 53"
Inside Diameter: 45" x 45"

Piece Count: 12" Cap Units: 24
8" Cap Units: 24
Corner Units: 12

Instructions

1. Remove packaging from the fire pit on the pallet.
2. Prepare the fireplace location by establishing a level surface about 60" x 60".

3. Transfer the top layer of the fireplace to desired location. This will become the bottom layer of the fire pit. Note: Transferring one layer at a time before the next layer will help maintain the proper orientation of the corner pieces.

5. Transfer the third layer.

Fire pits should only be built over a non-combustible surface (concrete patios, pavers or a compacted gravel base.) Never install over a wood deck.

4. Transfer the second layer. Note the 11-inch side of the corner block will now be over the 6.5" side of the corner block beneath.

6. Fill the inside of the fire pit with gravel or base rock a minimum 2 inches deep.
