MASONRY *Build Beauty That Lasts*

BRICK | SLIMBRICK | NATURAL STONE | CULTURED STONE

Kendall Anderegg
President, Mutual Materials

Hello,

Thank you for considering Mutual Materials for your project.

At Mutual Materials our purpose is building beauty that lasts. We help our customers build better, more inviting communities by providing appealing masonry and hardscape products that stand the test of time.

Our high quality masonry and hardscape products are ultimately used to create beautiful buildings, family homes, relaxing public landscapes and private outdoor living areas. It is inspiring to see the visionary uses of our products in our community, creating hospitals, schools, stadiums, businesses, homes, parks and backyard spaces.

Mutual Materials is also a family business and we locally manufacture the products we sell. From humble beginnings with one brick plant in Seattle during 1900, we have grown today into a major regional employer operating more than 10 manufacturing plants and 16 branch offices across Washington, Oregon, Idaho, Montana and British Columbia.

On behalf of the team here at Mutual Materials, we appreciate our customers. Thanks for the opportunity to win your business, and we hope that we can help you build beauty that lasts.

Sincerely,

Kendall Anderegg
President, Mutual Materials

ENVIRONMENTAL COMMITMENT

We are committed to sustainable business practices and eco-friendly products.

Mutual Materials manages company operations to high standards from mining and manufacturing through distribution and branch offices. Our eco-friendly products are used to create green buildings and beautiful outdoor hardscapes that maximize energy and resource conservation.

IN OUR OPERATIONS

CARBONCURE™

Recycling in Production Processes

We use recycled materials within our products and manufacturing processes.

Water Conservation

We manage stormwater plus recycle and reuse water in our manufacturing processes.

CarbonCure™

We can recycle carbon dioxide through CarbonCure technology to make greener concrete products on specified projects.

Energy Efficient Equipment

We invest in energy efficient equipment and low emission vehicles, from using propane-powered forklifts in our distribution yards to hybrid transport vehicles.

Soil Reclamation

We incorporate best practices for soil and reclamation for all plants and mining operations.

Supply Chain Fleet Management

We are a member of SmartWay, a public-private initiative with the EPA to improve environmental performance of goods moving throughout supply chains.

IN OUR PRODUCTS

Natural, Recyclable Products.

We make products from natural resources and recycled materials.

Resource Conservation

Masonry and hardscape provide energy efficiency to buildings and water conservation for landscapes.

United States Green Building Council (USGBC)

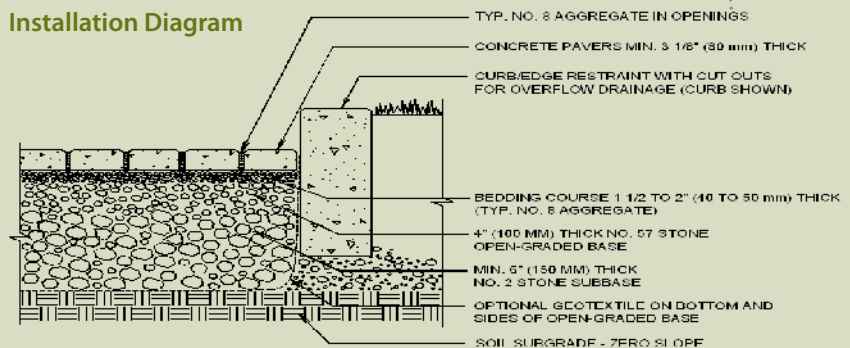

Our product line qualifies for contribution towards LEED credits.

PERMEABLE PAVERS

A critical element in the management and treatment of stormwater runoff, permeable pavers are becoming incredibly popular in sustainable design. Used in both commercial and residential applications, permeable pavers also play a key role in the reduction in heat-island effect and erosion.

Permeable Paver Installation Diagram

BRICK

Made simply of clay and shale, brick is one of the world's oldest "green" products. In addition to being one of the most aesthetically versatile design products, brick provides many functional benefits in a building envelope. Besides being fireproof, insect-proof, low-maintenance and a natural insulator, brick is also 100% recyclable.

BRICK – THE SMART DESIGN CHOICE

From stately mansions to traditional rowhouses to contemporary homes, brick has been a top design choice for centuries. Along the way it has evolved from being just a structural material to an architectural complement as well, coming in endless colors and shapes. There are a variety of reasons brick continues to endure.

Style

Brick is multi-dimensional, allowing you to achieve virtually any architectural design through a variety of shapes, textures, and colors. Whether building a contemporary home or remodeling your current one, brick can meet your personal style.

Quality

We might not be able to define quality but we know it when we see it. Your home lets others know who you are and what you value. With hundreds of years of proven performance, building with brick is building for generations.

Sustainability

Brick is made of clay, shale, and water, some of the most abundant natural resources. Brick also contributes to sustainable design through its long life span, energy efficiency, durability, recycled content, local availability, acoustic insulation, low construction waste, and potential for reuse.

Maintenance Savings

Brick will not rot, fade, peel, or dent. Brick never needs painting or sanding. Think of the time, energy, and money you can save by never having to maintain your siding.

Energy Conservation

As a natural insulator, brick is slow to absorb or lose heat. You'll be warm in the winter and cool in the summer, all while saving money on fuel bills.

Fire Resistance

Made from clay fired at nearly 2,000°F, brick is the most fire resistant siding material available. Because of this, many insurance companies offer reduced rates for brick homes.

*Mutual Materials manufactures
structural brick, face brick and Slimbrick tile.*

BRICK

Veneer	8	Outdoor Features	9
Details	8	Brick Collections	10–15
Interior Features	9		

Veneer

Brick is an excellent choice, whether you build a home or just add flair with an accent elevation or wainscoting. Used alone or in combination with another material, brick appeals to any style, from craftsman to contemporary; Tudor to Queen Anne.

Details

Brick details around windows and doors enhance a home's look. Use simple headers and sills to balance an elaborate design, or include arches and keystones to add subtle design elements.

Interior

Brick brings a feeling of hospitality and warmth to interior spaces. Adding brick to an accent wall, fireplace, kitchen, or wine cellar turns ordinary spaces into works of art.

Outdoor Features

To extend the architectural design beyond the four walls of your home, use brick on outdoor kitchens, fencing, pillars, lamp posts, and planters. It will withstand the elements, never rotting, fading, or peeling.

RIVER ROCK & STREAM STONE

Randomly shaped River Rock has the warm and inviting look of stones rounded by years of tumbling in a northern forest riverbed. Comfortable and timeless, River Rock can be used to accentuate a variety of interior and exterior designs.

Stream Stone has a smooth, rounded texture that convincingly reproduces the look of worn stones found in rippling streams. It provides realistic color blends and can be used as an accent or to adorn an entire wall.

TRIM STONES

A treatment for doors and windows that's perfect with brick, stone and Cultured Stone®. They can be cut or shaped to conform to any arch radius. Trim Stones come in two colors, carefully selected to blend or contrast with today's architectural styles and colors.

WATERTABLES & SILLS

These products provide the trim answer for the top of a wainscot or a window sill application. Cultured Stone® Watertables and Sills have the right pitch and drip edge for clean water runoff.

Nominal Size: 2 1/2" x 18"

HEARTHSTONES

There's a matching or complimentary hearth stone for every fireplace. All Hearthstones are 1 3/4" average thickness. Rectangular Hearthstones are 19" x 20".

CAPSTONES AND PIER CAPS

Capstones give architectural finish and weather protection to masonry walls, pillars, columns and piers. We recommend using a sloped cap that extends 1" to 2" beyond the facing of exterior walls.

* Not all colors and textures shown here are stocking products—please consult a sales representative for product availability. The colors and textures shown here are as accurate as possible. Due to the limitations of photography, the actual product shipped is not guaranteed to duplicate each color and texture shown here. Final color and texture selection should be made from actual samples.

FIREPLACE SYSTEMS *We can help realize your dream*

Mutual Materials has the products and systems you need to create the perfect outdoor living space. We offer a wide variety of masonry products and component systems that can produce beautiful fireplaces, pizza ovens, fire pits and outdoor cabinets. We can also provide you with a wide-range of veneer options like brick, natural stone and Cultured Stone to complete the look you want. Need contractors to bid on your project? We have a program for that too. We can line you up with qualified contractors who can build your project just the way you envision it. See page 43 for more details.

FIREPLACE SYSTEMS

Families have long used fireplaces as the focal point for their social gatherings. There is nothing like the ambiance of a warm, inviting fire to brighten the spirits of your family and friends. Indoor fireplaces have always been a long-standing staple of American homes. Now outdoor fireplaces are also becoming more popular and affordable. The dream of having an outdoor living space, complete with a wood or gas burning fireplace, has become a reality for many homeowners. We can help you realize this dream too.

MASONRY ACCESSORIES

PROFESSIONAL MORTARS & GROUTS

Designed for the professional and engineered for performance. DesignMix™ mortars and grouts are superior products in terms of workability, performance and quality. In addition, DesignMix™ products are engineered to meet or exceed specification standards for most projects, thus ensuring proper application for diverse construction environments.

CLEANERS & SEALERS

Mutual Materials offers a full line of masonry cleaners and sealers for brick, Cultured Stone® and natural stone. Your Mutual Materials branch can recommend the right cleaner for your project. Follow directions on the label for best results. Cultured Stone® should not be cleaned with any materials containing acids.

METAL PRODUCTS

Mutual Materials offers a full line of metal wall ties, wire reinforcing, rebar, and flashing.

TOOLS & EQUIPMENT

Mutual Materials carries a full line of masonry tools and equipment from leading manufacturers.

FIREPLACE COMPONENTS

Whether your project is an indoor or an outdoor fireplace, we offer the materials needed to finish your project. Products available include firebrick and block, flue liners, dampers, angle irons and fireplace components. Check with your local Mutual Materials branch for more information.

Have a project? We can help!

As a manufacturer, Mutual Materials does not offer design or installation services directly, but we know who does. We work with the top contractors for masonry, construction and landscaping.

Contractor Connect Program:

- ▶ Tell us about your project
- ▶ We reach out to our trusted network and match you with multiple contractors who are familiar with your needs
- ▶ You select the best fit and complete your project

Please visit one of our branches or call us at:
