At Mutual Materials, we are proud of what we do and are inspired to see our products chosen by professionals to build communities. Our products build beauty that lasts through hospitals, schools, stadiums, businesses, family homes, public parks, and backyards. Mutual Materials has long served a professional network of architects, interior designers, builders, masons, and landscape design professionals. Today we also serve residential homeowners, both through our professional networks and through our retail branch locations.

A Message from our President

Kendall Anderegg
President, Mutual Materials

Have you ever spent time looking at your local sports stadium, or your child’s school, or even your neighbor’s backyard and wondered where the products come from that put it all together? Well, that’s what Mutual Materials does – we have been part of building beauty that lasts over one hundred years.

Since 1900, we have been providing masonry and hardscape products to customers in the Pacific Northwest to help them create inviting communities that stand the test of time. Our products are used to create schools, stadiums, public landscapes, business parks, family homes and gardens, and much more.

Mutual Materials is also a family business and we locally manufacture the products we sell. From humble beginnings with one brick plant in 1900, we have grown today into a major regional employer operating more than 10 manufacturing plants and 16 branch offices across Washington, Oregon, Idaho, Montana, and British Columbia.

This Product Guide helps you compare our different products so that you can select the perfect shape, size or color for your project needs. If you are looking for project ideas and examples, I encourage you to get one our Idea Books or visit our website to see a library of home project ideas plus our full product lines of hardscape and masonry products available to home owners. On behalf of the team here at Mutual Materials, we appreciate our customers and thank you for considering our products to build your home and yard improvement projects.

Sincerely,

Kendall Anderegg
President, Mutual Materials

PROJECT WORKSHEETS

PAVING STONE PROJECT

STEP A: Find total square footage

1. Make a drawing of your project (to 1 inch scale if possible).
2. Choose your stone shape and color.
3. Find the total square footage of your project using Step B below.
4. Locate your stone square footage on the product price label.

STEP B: Formula to determine stones for the project

1. Multiply the length by the width to get the total square footage of the project.

_____ Length in feet **X** _____ Length in feet = _____ Total square feet

2. Multiply the total square footage of the project by square footage of the stone you chose.

_____ Sq. ft. **X** _____ Sq. ft. per stone = _____ Total stones needed
(calculated above) (calculated on price labels)
