

# Mutual Stonehenge 58" Circle Fire Pit

**Size:** Outside Diameter: 58"  
Inside Diameter: 43"

**Piece Count:** 63 pieces  
8" Tapered Caps: 46  
8" Jumbo Units: 17

Fire pits should only be built over a **non-combustible surface** like concrete patios or a compacted gravel base. **Never install a fire pit over a wood deck.**

## Instructions

1. Remove packaging from the fire pit on the pallet.
2. Prepare the fire pit location by establishing a level surface about 65" x 65"

3. Build the bottom layer by laying 23 8" tapered caps in a circle. You may have to adjust the blocks and use a rubber mallet to get the blocks to fit.
4. For the second layer place all 17 8" x 8" jumbo units roughly 3 inches apart. Adjust the blocks until you are pleased with uniformity of spacing.

5. Place the remaining 23 8" caps on top of the jumbo blocks.
6. Fill the inside of the fire pit with 2 inches of gravel or base rock and your fire pit is complete.
