

MORA THIN BRICK

Mora Thin Brick
in Black Sapphire

Brick is not just for construction anymore. Now with Slimbrick tile, it's easy to add the beauty of brick almost anywhere.

With the classic appearance of full-size brick, but with thinner dimensions, Slimbrick is well suited for applications where weight, thickness, or codes require a thin veneer product. As well as interior applications such as backsplash, accent walls, fire places, or more.

Manufactured in Spain, Mora Thin Brick is an allied product sold by Mutual Materials.

STANDARD SPECIFICATION

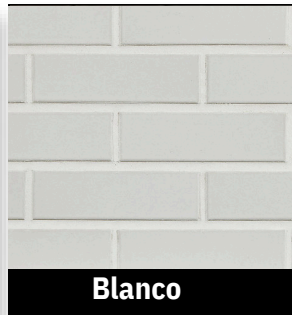

Mora Thin Brick are manufactured to industry standard specifications ASTM C-1088, Grade Exterior, Type TBX, PCI.

INSTALLATION PATTERNS

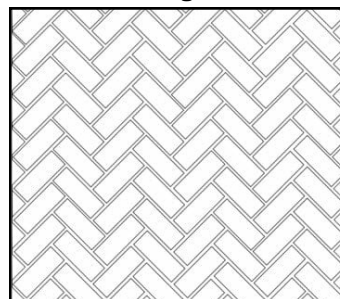

Running Bond

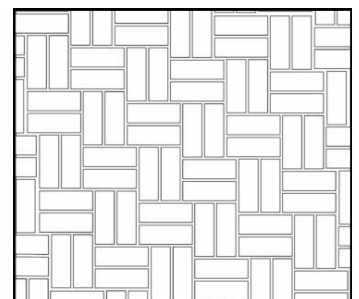

Stacked Bond

Herringbone

Basketweave

INSTALLATION INFORMATION

Thin brick installation details vary depending on the type of wall, the pattern, and the materials used. Thin brick can be installed over cement board, water-resistant drywall, or directly on the wall using a non-sagging adhesive or mortar. Interior and exterior applications will differ. The number of bricks needed depends on the area to be covered and the size of the bricks. Local building codes and professional guidance should be consulted for specific installation requirements.
